

## **PROTOCOL 29**

### ***ON VOCATIONAL TRAINING***

In order to promote the movement of young people within the EEA, the Contracting Parties agree to strengthen their cooperation in the field of vocational training and to endeavour to improve conditions for students wishing to study in an EEA State other than their own. In this context they agree that the provisions of the Agreement concerning the right of residence for students do not alter the possibilities of individual Contracting Parties, existing before the entry into force of the Agreement, as to the tuition fees charged to foreign students.
