

APPENDIX 1 TO ANNEX I

PRODUCT SPECIFIC RULES

Interpretative Notes

1. The first column of the list of product specific rules set out in this Appendix contains chapters, headings or sub-headings and the second column sets out a description of the product. For each entry in the first two columns, one or two rules are specified in columns 3 and 4. If the HS code in column 1 is preceded by an “ex”, this means that the rules in column 3 or 4 apply only to the part of that chapter or heading described in column 2. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, either one may be applied. If no origin rule is set out in column 4, the rule set out in column 3 shall be applied.
2. Pursuant to subparagraph 1 (b) of Article 2 (General Requirements) of Annex I (Rules of Origin and Administrative Cooperation), the product specific rules may be fulfilled by operations in different factories, provided the working or processing takes place within the territory of a Party and, taken together, fulfils the requirements of Annex I (Rules of Origin and Administrative Cooperation).
3. A product specific rule of origin set out in this Appendix represents the minimum amount of working or processing required to be carried out on non-originating materials for the resulting product to achieve originating status. A greater amount of working or processing than that required by the rule for that product shall also confer originating status.
4. If a product specific rule in the list specifies that a product may be manufactured from more than one material, any one or more materials may be used. It does not require that all be used.
5. If a product specific rule in the list specifies that a product must be manufactured from a particular material, the condition does not prevent the use of other materials in addition.
6. If a product specific rule excludes materials classified in certain chapters, headings, or sub-headings of the Harmonized System, those materials must be originating for the products to qualify as originating.
7. If a product, which has acquired originating status by fulfilling the conditions set out in the list, is further processed and used as material in the manufacture of another product, the product specific rule applicable to the final product does not apply to the material. No account shall be taken of the non-originating components of that material.
8. Where a rule uses the expression “Manufacture from materials of any heading”, then materials of any heading, even materials of the same description and heading as the product, may be used, subject, however, to any specific limitations which may also be contained in the rule.

9. The products mentioned in the list are not all covered by the Agreement. Other part of the Agreement, e.g. exclusion lists and dismantling lists, must be taken into account in order to come to the conclusion whether preferential access may be granted to a final product imported from a Party.

10. A product falling within Chapter 30 of the HS obtained in a Party by using cell cultures, shall be considered as originating in that Party. "Cell culture" means the cultivation of human, animal and plant cells under controlled conditions (such as defined temperatures, growth medium, gas mixture, pH) outside a living organism.

11. A product falling within Chapters 28 to 40 of the HS obtained in a Party by fermentation shall be considered as originating in that Party. "Fermentation" means a biotechnological process in which human, animal, plant cells, bacteria, yeasts, fungi or enzymes are used to produce a product falling within Chapters 28 to 40 of the HS.
